

LUCAS BEZERRA DE MENEZES CABRAL

Software Engineer | Full Stack & UI/UX Developer

Rio de Janeiro, Brazil | lucasbezerracontact0@gmail.com | [linkedin.com/in/lucas-bezerra-51030b303](https://www.linkedin.com/in/lucas-bezerra-51030b303) | github.com/Lucvs1

PROFESSIONAL SUMMARY

Software Engineer with a solid analytical background forged through Industrial Automation technical training (Firjan SENAI) and an ongoing degree in Software Engineering. Specialized in architecting high-performance web applications and fluid interfaces with Next.js, TypeScript, and GSAP, RESTful API architecture, and asynchronous microservices with analytical rigor in fault tolerance.

EDUCATION & TECHNICAL BACKGROUND

B.S. in Software Engineering

Anhanguera | Expected: 2027

Emphasis on requirements engineering, microservices, event-driven architecture, cybersecurity, and modern software engineering practices.

Industrial Automation Technician

Firjan SENAI | Completed: 2022

Programming of Programmable Logic Controllers (PLC), industrial instrumentation, field communication networks (Modbus/Ethernet), and mission-critical process control.

SELECTED PRODUCTION PROJECTS

ROTA BGR (Web Application)

Deploy: rotabgr.vercel.app

Stack: Next.js (App Router), React, TypeScript, Tailwind CSS, GSAP

Interactive web platform for a GTA RP/MTA police department. Features complete admin dashboard, patrol fleet & uniforms catalog, Legends memorial, and recruitment system with Discord Webhook and PDF dossier generation.

Cantinho da Cigana (Cultural E-commerce & Tarot Platform)

Deploy: cantinhodacigana.vercel.app

Stack: Next.js, React, Tailwind CSS, Design System, Mystical UI/UX

Cultural e-commerce and platform focused on Gypsy Tarot readings booking and themed content sales, achieving elite Core Web Vitals scores and conversion-oriented UX.

Bot Gateway Pro (Discord Payments & Delivery Bot)

GitHub: github.com/Lucvs1

Stack: Discord.js, Mercado Pago, Stripe, Node.js, Async Webhooks

Discord bot for in-app monetization with instant PIX and Card/Crypto checkout. Automatically grants server roles and delivers purchased digital files directly to buyers post-sale.

TECHNICAL ARSENAL & COMPETENCIES

Front-end & Creative Dev: Next.js (App Router), React, TypeScript, Tailwind CSS, GSAP, Lenis Scroll, HTML5/CSS3.

Back-end & Infrastructure: Node.js, Express, RESTful APIs, MySQL, Docker, Bash/Shell Scripting, Git/GitHub, Vercel.

Design, UI/UX & Methodologies: Figma, Design Systems, Adobe Photoshop, Illustrator, Prototyping, Fluid UX, A11y.
